

SaaSify — Frontend Testing Report

Full-stack business chat platform · React (Next.js) + Node.js backend + MongoDB Atlas

Environment: http://localhost:3000 (frontend) · http://localhost:5000 (API) · MongoDB Atlas (cloud)

Test date: September 2026 · **Result:** 17/17 API flows passed

Admin: admin@example.com / Admin@123 (Super Admin) · **Customer:** rahultest / secret123

Summary of automated flow tests

- ✓ Register customer → auto-login (OTP disabled flag works, token returned)
- ✓ Login by username, email, and phone
- ✓ Duplicate username/email/phone blocked (409)
- ✓ Super Admin promotes a customer to Admin; both see the shared support inbox
- ✓ Customer message appears instantly for all admins (shared inbox)
- ✓ Customer sees only their own thread
- ✓ Admin demoted back to customer
- ✓ Suspend / reactivate user; suspended login blocked
- ✓ Plan list + subscribe (Starter) confirmed on profile
